

October 7, 2004.

Ethos Environmental, Inc.  
7015 Alamos Ave.  
San Diego, Ca 92154

Gentlemen:

It is my pleasure to verify and validate the results obtained from the use of Ethos FR in our fleet. To date we have seen a 63.9% average reduction in opacity fleet wide, as well as a 10% reduction in fuel consumption.

Pacific Waste started a trial program using Ethos FR in December 2000 in 10 of our waste hauling trucks. Having proven favorable results we implemented a second phase treating our central fuel tank in order to evaluate Ethos FR in our entire fleet.

We have been using Ethos FR in our entire fleet of more than 250 trucks, since the original trial program and are very happy with the sustained reduction in smoke opacity and the reduced maintenance costs.

Sincerely,

A handwritten signature in black ink, appearing to read "Steven L. Mieser", written over a horizontal line.

Steven L. Mieser
